| 400 | 15.3 | 23.7 | 29.4 | 36.3 |

Drainage Pipe Systems

To make sure a traffic route remains operational in the long term, it is essential to have a drainage system that is continuously effective. A.A.H Plast® piping systems ensure controlled discharge of leachate water, surface water and artesian water and provide maximum reliability to ensure the long-term stability of rails and roads.

A.A.H Plast® overview of types

Perforated Pipe Systems

A.A.H Plast Ltd- manufactures perforated pipes at the customer's request.

Working according to international standards. all pipes made of materials (HDPE, PP, PVC, PVDF, GRP) can be cut by CNC machine, in diameters up to 400 mm.

Perforated rainwater drainage pipes, soil gas intake pipes, and other additional filters.
